

STEM Careers

AGRICULTURAL ENGINEER | Agricultural engineers bring technology to traditional agriculture by improving methods for livestock raising and crop production. They aim to improve yield (how many crops are produced), safety, and available food and food supplies. Agricultural engineers make technological advances in existing machinery, create new equipment and design state-of-the-art facilities. They also study ways to ensure water quality and pollution management.

School Datebooks

FOOD SCIENTIST | Food scientists study food's nutrients and other contents. They identify new food sources and improve methods for processing and preserving food. They also address the world's hunger, needs with solutions for growing, storing, packaging, and distributing food supplies.

MECHANIC | Care, maintenance, and repairs are all on a mechanic's to-do list. These professionals know every detail of the machines and equipment they work on. Most specialize in key areas — cars, airplanes, refrigerators, or other machines — and think that covers the mechanics. Because equipment is always changing and being invented, mechanics must continually learn new techniques and procedures.
